

Commercial Carpet Inspection Course

The Commercial Carpet Inspector's Course has been developed to address a void in the inspection industry. This class will combine both inspection and installation techniques in order to properly evaluate commercial carpet claims.

This course is an intense 2 day training program (normally a 4 day class, but those attending the Guild Seminar will address 1-2 day of Inspector Training Programming). It is intended for floor covering inspectors and those in commercial carpet-related businesses interested in expanding their depth of knowledge.

This course includes:

- Proper Floor Prep & Moisture Testing
- Proper Installation and Pattern Matching Procedures
- Carpet Adhesives
- Pattern Issues
- Carpet Tile Issues
- Maintenance Issues
- An Overview of Woven Products
- Proper Techniques for Communicating Commercial Carpet Concerns through Report Writing

Special attention will be dedicated to understanding and assessing bow, skew, and pattern elongation. This course will also concentrate on the proper use and application of adhesives and product performance evaluation procedures.

In addition to the instructional portion of the class, participants will also be challenged to evaluate sample pattern match concerns, adhesive samples, and determination of proper adhesive application.

Upon completion of the course, participants have the opportunity to take the certification exam. The exam is open book. It will include both multiple choice and short answer sections. Those who successfully pass the exam will be classified as a Commercial Carpet Inspector with Inspector Training Services
